## SUMMARY

---

Full-stack developer specializing in the TypeScript ecosystem (Next.js, Express, Prisma), with experience building AI-related projects involving LLM, STT, and TTS. Interested in real-time systems, streaming architectures, and scalable deployment using Docker and Linux.

## EDUCATION

---

|                                                                                                                     |                |
|---------------------------------------------------------------------------------------------------------------------|----------------|
| <b>National Yunlin University of Science and Technology</b><br>B.S. in Computer Science and Information Engineering | 2023 – Present |
| <b>Chiao Tai Senior High School,</b><br>Vocational High School Diploma, Information Technology                      | 2020 – 2023    |

## EXPERIENCE

---

|                                                                                                                                                                                                                                                  |             |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>National Yunlin University of Science and Technology - Network Management Team,</b> Deputy Team Leader                                                                                                                                        | 2025 – 2026 |
| <ul style="list-style-type: none"><li>• Maintained and troubleshoot dormitory network infrastructure.</li><li>• Coordinated technical training and workshops.</li><li>• Assisted with system operations, documentation, and equipment.</li></ul> |             |

## AWARDS

---

|                                                                                                                                       |      |
|---------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Merit Award, ITSA Generative AI Web Application Design Competition</b>                                                             | 2026 |
| <b>1st Place, Retail Innovation Category, Taiwan Generative AI Hackathon (AWS x DIGITIMES)</b>                                        | 2025 |
| <b>3rd Place, YunTech AI Competition</b>                                                                                              | 2025 |
| <b>Finalist, 2025 TEL Robot Combat (Tokyo Electron Creative Robot Competition)</b>                                                    | 2025 |
| <b>Second Place (Golden Hand Award), Computer Hardware Maintenance, National Senior High School Industrial Technology Competition</b> | 2022 |

## PROJECTS

---

|                                                                                                                                                                                                                                                                                        |             |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Integrated Learning Platform for Health Care</b>                                                                                                                                                                                                                                    | 2025 – 2026 |
| <ul style="list-style-type: none"><li>• Built a monorepo full-stack system using Next.js, Express, Prisma, and MySQL.</li><li>• Designed backend architecture with repository pattern and Zod validation.</li><li>• Containerized services with Docker and integrated MinIO.</li></ul> |             |
| <b>Mega Line Reserve</b>                                                                                                                                                                                                                                                               | 2026        |
| <ul style="list-style-type: none"><li>• Developed a full-stack appointment system using Next.js and Express.</li><li>• Integrated LINE Messaging API for automated notifications.</li><li>• Managed database with Prisma and MySQL, deployed via Docker.</li></ul>                     |             |

## Personal Portfolio Website

2026

- Built a portfolio with Next.js and TypeScript.
- Self-hosted on Proxmox with OPNsense (DMZ).
- Docker + Caddy reverse proxy (HTTPS).

## SKILLS

---

- Frontend: Next.js, TypeScript, JavaScript, Tailwind CSS
- Backend: Node.js, Express, Prisma, MySQL
- DevOps & Tools: Docker, Proxmox, Linux, Git
